## U.K. To Ask For Wood Utilization Center In Breathitt

The University of Kentucky will ask the 1962 General Assembly to appropriate funds to establish a Wood Utilization Center to find more use for the state's timber resources.

"The activities of the center would be devoted to demonstrating new uses for timber in Kentucky, thereby improving the economic conditions in the state," University President Frank G. Dickey explained.

The center would be located at the University's Robinson sub-station in Breathitt County.

One of the objectives of the center would be to demonstrate the advantages of establishing wood processing operations in the state, making better use of Kentucky's timber and labor resources.

## Uncle Ned ... From Dogtown

DEAR MISTER EDITOR:

Zeke Grubb's preacher come by the country store Saturday night and set with us fer a spell. It's the first time I can recollect we've had the preaching perfection represented at one of our sessions.

The good Parson said he had a big wife and a little house and he took up preaching so's he would have some place to talk. He told the feller it ain't knowed much by the public but most churches has now got quotas and a preacher moves up the ladder according to his reputation fer meeting them quotas.

If a preacher don't git the share of new members, he's liable to keep right on preaching like he is—at a country church.

The Parson allowed as how meeting the quota was gitting to be real tough. He said you got to steal the new members from some other church and a heap of times they don't want to leave their own church. He says when a newcomer moves into his neighborhood, first off he goes right away and mows his lawn to soften him up, then he offers to baby-set at any time fer free. He said the Membership Committee was discussing a plan fer giving trading stamps in their next drive.

Speaking of committees, he claims the public don't know it but committees is the backbone of the church. Fer instance, he

explained, they got 14 committees at his church and all of them is doing a outstanding job. He had special praise fer the Stove Committee and the Garbage Committee. The Planning Committee, he announced, was figuring on gitting another garbage can fer the church kitchen and in that case, they'd probable have to add a member to the Garbage Committee.

He said his church had 301 committee meetings last year and he attended ever meeting. He claims he don't have much time no more to read the Good Book on account of attending so many committee meetings. Right now, fer instance, the Fund Committee is working on a chicken dinner project.

He says he is agin church dinners as a general thing and aims to speak his piece at the next committee meeting. He claims the congregation eats chicken with a wonderful Christian spirit but backslides in paying fer the chickens.

It was mighty educating, Mister Editor, to have a preacher explain how things works on the inside, especial in this matter of quotas and committees. Fer instance, we ain't got no Stove Committee at our church and I aim to take the problem up Sunday.

And I'll bet this feller is a real good preacher too, puts the religious fodder down on the ground where the billy-goats can reach it, and if there is any giraffes in the congregation, they can stoop over.

Yours truly,  
Uncle Ned.

## ASC News & Facts

**BY ROBERT RUDOLPH**

Wheat growers of Marshall County are being reminded by the County Agricultural Stabilization and Conservation Service Office today that the period for signing up under the program continues through Dec. 1.

Renloe Rudolph, Marshall County ASC Committee Chairman, said it is important for farmers of the county to come into the county office to get information about the 1962 wheat stabilization program.

The wheat stabilization program, recently enacted by the Congress, is designed to reduce national wheat acreage by at least 10 per cent. Wheat farmers are encouraged to make additional voluntary reductions for which a higher rate of payment is available.

Chairman Rudolph urged county farmers who are interested in the wheat stabilization program to get in touch with the County ASCS Office.

A shorn wool incentive price of 62 cents per pound has been announced by the U. S. Department of Agriculture for the 1962 marketing year, which begins April 1, 1962. The mohair support price is set at 74 cents per pound.

According to Renloe Rudolph, chairman, County ASC Committee, the 1962 price for wool is the same as for the first seven years of the program. The mohair price is up 1 cent.

Payments to producers for the 1962 marketing year will follow the same methods used for the current 1961 year. Shorn wool payments will be equal to a percentage of each producer's cash returns from wool sales.

Payments for the 1962 marketing year will be made on shorn wool and unshorn lambs marketed during the April 1, 1962-March 31, 1963 period. Payments will be made in the summer of 1963 following the end of the marketing year.

County ASC offices now are making payments for the 1960 marketing year, covering marketing from April 1, 1960, through March 31, 1961. The payment rate for shorn wool for 1960 was 47.6 per cent, the amount required to bring the average price of 42 cents per pound of shorn wool, grease basis, up to the 62-cent incentive level. This resulted in payment of \$47.60 for every \$100 received from the sale of shorn wool. The

## LETTER

Benton School  
Benton, Kentucky  
October 25, 1961

Dear Mr. Wyatt:  
We really enjoyed our trip to the Printing Office. We never thought a printing office could be so interesting.

There are so many machines you can hardly find your way around. It's a wonder to think that all these papers can be printed every week, and be so interesting and informative.

We're sure Johann Gutenberg had this in mind when he invented the printing press. We would like to make many more visits to the Printing Office.

Sincerely,
